Exact recall against load: clean cues (solid) and cues missing 40% of their cells (dashed), mean ± 1 std over seeds
Random patterns, 225 cells, 10 on
Random patterns, 1,000 cells, 44 on
Random patterns, 4,000 cells, 178 on
Drawings, evaluation alphabets, 225 cells, 10 on
Drawings, evaluation alphabets, 1,000 cells, 44 on
Drawings, evaluation alphabets, 4,000 cells, 178 on
Exact recall (%)
Pseudo-inverse, clean
Pseudo-inverse, 40% removed
Covariance, clean
Covariance, 40% removed
Clipped binary, clean
Clipped binary, 40% removed
Ideal lookup, 40% removed
Stored patterns (load); grey line: load = cells, where the pseudo-inverse weights become the identity
